Trading and investing in cryptocurrencies involves substantial risk of loss and is not suitable for every investor. The valuation of cryptocurrencies and futures may fluctuate, and, as a result, you may lose more than their original investment. The highly leveraged nature of futures trading means that small market movements will have a great impact on your trading account and this can work against you, leading to large losses or can work for you, leading to large gains.

If the market moves against you, you may sustain a total loss greater than the amount you deposited into your account. You are responsible for all the risks and financial resources you use and for the chosen trading system. You should not engage in trading unless you fully understand the nature of the transactions you are entering into and the extent of your exposure to loss. If you do not fully understand these risks you must seek independent advice from your financial advisor.

Cryptocurrencies constitute a rapidly changing and unpredictable environment with an endless number of variables and factors, which are outside of your control, and Stargate Ventures’ control. New risks emerge at every moment, which creates investment/market risk and uncertainty. Stargate Ventures is not responsible for communicating, anticipating or detecting all known and/or unknown risks inherent in the markets.

Therefore, you are cautioned and warned to not rely on any forward-looking statements, information or opinions communicated by Stargate Ventures or any member, owner, affiliates, investor, employee, advisor, board member or officer.

In addition, actual results, performance or events may differ materially from those contained in the forward-looking statements, marketing information, testimonials, sales material, case studies, course information, communications, videos, content, opinions disseminated by Stargate Ventures or any of its members, owners, investors, employees, advisors, affiliates, board members or officers. Some of the factors that could affect actual results, performance or events to differ materially from the forward-looking statements provided by Stargate Ventures, without limitation: market volatility; government policies and regulations; hacks and security breaches resulting in theft or damage to investors, currencies or companies; price manipulation by high-net worth investors; news; fake news; competition; general economic, market or business conditions; macroeconomic conditions; geopolitical conflict or any other unmentioned or unforeseen influence that could favorably or negatively impact the Cryptocurrency markets.

Investing in cryptocurrencies is an individual venture. You must therefore carefully consider your capabilities, experience level, skill level, risk tolerance and investment objectives before investing in the commodity futures market, cryptocurrencies, ICOs, commodities, stocks, bonds and any other financial investment. As such, all trading strategies are used at your own risk. It is recommended that you **never risk more than you are willing to lose**. Leverage can lead to substantial losses. Any use of leverage, margin or shorting techniques is at your full discretion.
